SUMMARIES OF THE TABLES AND EXPLANATORY NOTES.

I.

ADMINISTRATIVE DIVISIONS.

[TABLE 1, PAGES 1 TO 2.]

For the purposes of administration British India is divided into Provinces, varying greatly in area and population. There are eleven provinces, excluding the penal settlement of the Andaman Islands, of which the administration is controlled by the Home Department of the Government of India. Another, the twelfth—British Baluchistan—is controlled by the Foreign Department.

Two of these provinces—Madras and Bombay—are called Presidencies, and each is administered by a Governor presiding over an executive Council.

Bengal, the North-Western Provinces and Oudh, the Panjab, and Burma are administered by Lieutenant-Governors, without an executive Council. In each of these provinces, as well as in Madras and Bombay, there is a Legislative Council. The Lieutenant-Governor of the North-Western Provinces also holds the office of Chief Commissioner of Oudh, formerly a separate province.

The head of the administration in the Central Provinces and Assam is a Chief Commissioner; in these provinces there is no local Legislative Council, and all laws for them, and for the other provinces in which there are no Councils, are made in the Council of the Governor-General.

Baluchistan, Coorg, Berar, and Ajmer-Merwara are also administered by Chief Commissioners, the office being held *ex-officio* by officials of the Political Service: by the Agent to the Governor-General for Baluchistan, by the Resident in Mysore for Coorg, by the Resident in Hyderabad for Berar, and by the Agent to the Governor-General in Rajputana for Ajmer-Merwara.

The Andaman Islands are also an *ex-officio* Chief Commissionership, held by the Superintendent of the penal settlement of Port Blair.

The administrative unit in all the provinces is the district, at the head of which is an officer commonly known as the district officer, who is officially styled Collector and Magistrate in the Regulation Provinces and Deputy Commissioner in the non-Regulation Provinces. In each district is a number of sub-divisions, each in charge of an officer subordinate to the district officer. In all provinces except Madras a number of districts are grouped to form a Commissionership or Division the officer in charge of the Division (Commissioner) having general control of the district officers and forming a link of communication between them and the Provincial Government. There are in British India (excluding Baluchistan and the Andaman islands):

46 Divisions or Commissionerships,
247 Districts,
1,045 sub-divisions of Districts,

for an area of 956,215 square miles containing a population of 221,173,677 according to the census of 1891. The revenue from this area amounted in 1898-99 to £30,948,891—in rupees 46,42,33,360, and of this sum £21,701,269 (₹32,55,19,040) represented the revenue derived from the land.

II.

JUDICIAL DIVISIONS.

[TABLES 1 AND 2, PAGES 3 TO 5.]

For the purpose of the judicial administration of the country, the provinces are divided in a manner which corresponds closely to the executive divisions. In these divisions there are 9,461 judicial officers of various degrees as follows:

72 Judges of High or Chief Courts, with jurisdiction over the whole province.
124 Judges of Courts with jurisdiction extending beyond one district.
492 Judges of Chief Courts of a district.
1,208 Judges of District Courts, not being the Chief Courts of a district.
7,565 Judges of other subordinate courts.

II—continued

JUDICIAL DIVISIONS—continued

These last consist almost exclusively of natives, and there are also many natives amongst the judges of the superior courts, including the High Courts.

These officers decided, in 1898, 4,584,183 cases, classed as follows :

	Regular.	Miscellaneous.	Total.
<i>Civil jurisdiction—</i>			
Original cases .	1,754,568	1,085,989	2,840,557
Appeals . .	88,611	7,783	96,394
<i>Criminal jurisdiction—</i>			
Original cases .	1,062,548	108,647	1,171,195
Appeals . .	72,426	18,696	91,122
<i>Revenue jurisdiction—</i>			
Original cases .	250,956	114,036	364,992
Appeals . .	11,534	8,389	19,923

Civil cases represented nearly two-thirds (64 per cent of) the whole number, regular civil cases forming 38 per cent, and 5 per cent of these were appeals.

Criminal cases represented 27·5 per cent of the whole number, regular cases being 23 per cent, and in these the ratio of appeals was 6·8 per cent.

In revenue cases the appeals are under 5 per cent of the regular cases decided.

The distribution of the civil original cases is as follows, as regards the larger provinces :

Madras	873,619
Bengal	722,974
Bombay	428,045
Panjab	316,440
North-Western Provinces	249,444

Looking at the number of cases and the number of the population, the ratio of distribution works out as follows :

Madras	1 case in 41 persons.
Bengal	1 " 99 "
Bombay	1 " 44 "
Panjab	1 " 66 "
North-Western Provinces	1 " 188 "

The receipts of the Courts, mainly derived from fees under the Court-fees Act, amounted, in 1898, to Rx. 3,689,954, while the charges were Rx. 3,553,249. That, however, was the first year in which the receipts exceeded the charges, and it may be noted that the items of charge are not completely stated in these statistics. The average annual receipts in the five years ending 1898 were Rx. 3,564,143, and the charges Rx. 3,564,703: it was the unusually large sum received in 1898 which so closely equalised the average receipts and expenditure.

In Bengal, Assam, and Madras the receipts always exceed the charges; but in the other provinces the position is reversed, the charges being greatly in excess of the receipts in the North-Western Provinces and Oudh, in Bombay, the Punjab, Burma, and the Central Provinces. Bengal contributes a large proportion of the total receipts, 36 per cent in 1898.

III.

CIVIL JUSTICE.

[TABLES 1 TO 4, PAGES 6 TO 17.]

The number of suits instituted in the Civil Courts has averaged slightly over two millions annually in the last five years :

1894	2,028,507
1895	2,062,425
1896	1,989,113
1897	2,044,299
1898	2,140,368

III—continued

CIVIL JUSTICE—continued

The decline in 1896 was due to a reduction in the number of suits under the Rent law, and of suits for immovable property; there has, on the other hand, been a material increase in the number of mortgage suits since that year. Suits under the Rent law also largely increased in 1898.

The total number of suits (2,140,368) in 1898, are thus classed :

For money or movable property	1,276,049	= 59·6
Under the Rent law	602,244	= 28·1
On mortgages	109,188	} = 9·4
For immovable property	93,105	
For specific relief	21,150	
Others	38,632	

Thus about 97 per cent of the litigation before the Civil Courts arises out of claims for money rent, and title.

The relative extent of litigation, and the proportion of litigation to population, in each province are stated below :

	No.	No. per 1,000 of population.
Bengal	630,538	8·8
North-Western Provinces and Oudh	432,402	9·2
Madras	373,792	10·5
Panjab	273,149	13·1
Bombay	213,034	11·3
Central Provinces	97,838	9
Burma	51,075	6·7
Berar	28,411	9·8
Assam	27,863	5·1

Relatively to the population the Panjab is the most litigious province in India, Bombay and Madras following next.

In the North-Western Provinces and Oudh 281,724 suits, and in Bengal 266,062 suits, were instituted under the Rent law, the bulk of suits in both cases being for arrears of rent and for eviction. Of suits for money or movable property the largest number are instituted in Madras :

Madras	316,030
Bengal	291,582
Panjab	212,944
Bombay	168,981
North-Western Provinces and Oudh	116,661

In Madras each of the last three years has seen an extremely large addition to the number of such suits.

Of suits on mortgages 31,862 were instituted in Bengal and 29,330 in Madras, the proportion to population being about twice as large in Madras as in Bengal.

The 2,139,683 suits instituted involved a money value of ₹26,83,70,269 (£17,891,351), classified as follows :

	No.
Value not exceeding ₹10	398,325
„ above ₹10 and not exceeding ₹50	923,043
„ above ₹50 and not exceeding ₹100	342,849
„ above ₹100 and not exceeding ₹500	303,015
„ above ₹500 and not exceeding ₹1,000	31,825
„ above ₹1,000 and not exceeding ₹5,000	19,619
„ above ₹5,000 and not exceeding ₹10,000	2,183
„ exceeding ₹10,000	1,623

Thus the number of suits in which the value involved does not exceed ₹500 (£33) is about 92 per cent of the whole number, and suits above that value fall away rapidly and greatly in number.

III—concluded

CIVIL JUSTICE—concluded

Of the total number of suits before the Courts, namely, 2,314,230 about half were uncontested and were disposed of as follows :

Compromised	280,515
Decreed on confession	203,210
Decreed <i>ex parte</i>	671,995
Dismissed <i>ex parte</i>	25,300
TOTAL	1,181,020

Contested cases were about 21 per cent of the whole, judgment being given for the plaintiff in 377,715 cases and for the defendant in 112,600 cases.

Relatively very few cases were referred to arbitration; of those so referred, 6,906 were given in favour of the plaintiff and 2,738 in favour of the defendant.

The average duration of cases varies much from year to year and in each province, being, however, much greater in Madras than elsewhere, though in 1898 Bombay took the lead :

	Days.	
	Contested.	Uncontested.
Bombay	191	89
Madras	135	62
Bengal	94	46
North-Western Provinces and Oudh	60	30
Panjab	43	21
Central Provinces	85	46
Assam	108	48
Upper Burma	32	20
Lower Burma	37	28

Some of the contrasts presented by these figures are sufficiently striking. Still more so are the figures which represent the duration of regular appeals from decrees. These in some provinces remain pending for an extreme length of time, the greatest having been 506 days in 1894 in the North-Western Provinces and Oudh. In 1898 the duration in the different provinces was as follows :

	Days.
Madras	242
Bombay	311
Bengal	265
North-Western Provinces and Oudh	293
Panjab	216
Assam	313
Central Provinces	62

In Burma the appellate work is disposed of with as much relative speed as the original work, the time occupied being in Upper Burma 37 days and in Lower Burma 52 days.

Of the 151,592 appeals before the Courts in 1898, there were

5,925 in which the decisions were confirmed.

5,647 were dismissed for default or were otherwise not prosecuted.

In the contested appeals, numbering 75,899, the decisions were reversed in 14,994 cases, being about one-fifth of the whole, and modified in 9,329 cases.

IV.

CRIMINAL JUSTICE.

[TABLES 1 TO 6, PAGES 18 TO 29.]

The average number of offences reported annually in the last five years was 1,464,220, in population amounting at the last census to 221,130,073. Of these 1,225,542, or 83·7 per cent, returned as true; and 1,075,916 cases were brought to trial.

IV—*continued*CRIMINAL JUSTICE—*continued*

The number of persons concerned averaged 1,733,754. In 1898 they amounted (including persons whose trial was pending from the preceding year) to 1,762,202, being 0·79 per cent of the census population. Of these 789,978 were acquitted or discharged and 842,391 convicted; the others having died, escaped, or remained untried at the end of the year.

Testing the relative criminality of the different regions of India by the number of cases brought to trial, the results are as follow in 1898:

Madras	.	.	.	.	.	.	313,088, being 88 in 10,000 of the population.
Bombay	.	.	.	.	.	.	237,360 " 126 " " " "
Bengal	.	.	.	.	.	.	201,423 " 28 " " " "
North-Western Provinces and Oudh	.	.	.	.	.	.	120,785 " 26 " " " "
Panjab	.	.	.	.	.	.	98,204 " 47 " " " "
Upper Burma	.	.	.	.	.	.	16,602 " 56 " " " "
Lower "	.	.	.	.	.	.	51,630 " 111 " " " "
Central Provinces	.	.	.	.	.	.	23,636 " 22 " " " "
Assam	.	.	.	.	.	.	15,671 " 29 " " " "

Of the total number (1,110,413) brought to trial more than half—639,248—were offences against special and local laws. It appears from the detail of the remainder that theft, assaults, and trespass constituted about two-thirds of them:

Affecting life	.	.	.	.	.	.	6,184
Inflicting hurt	.	.	.	.	.	.	101,719
Criminal force and assault	.	.	.	.	.	.	65,430
Against the public tranquillity	.	.	.	.	.	.	10,348
Contempts of the lawful authority of public servants	.	.	.	.	.	.	18,743
Affecting the public health, etc.	.	.	.	.	.	.	28,948
False evidence and offences against public justice	.	.	.	.	.	.	9,272
Relating to coin	.	.	.	.	.	.	775
Relating to weights and measures	.	.	.	.	.	.	1,329
Theft	.	.	.	.	.	.	79,719
Cheating	.	.	.	.	.	.	4,355
Mischief	.	.	.	.	.	.	23,006
Criminal trespass	.	.	.	.	.	.	47,541
Criminal intimidation, insult, and annoyance	.	.	.	.	.	.	20,839
Relating to marriage	.	.	.	.	.	.	10,388

The punishments inflicted by the Courts were as follow:

Death	.	.	.	.	.	.	461
Transportation	.	.	.	.	.	.	1,641
Rigorous imprisonment	.	.	.	.	.	.	138,486
Simple imprisonment	.	.	.	.	.	.	16,474
Fine	.	.	.	.	.	.	647,539
Whipping	.	.	.	.	.	.	25,564

The death sentences have stood at a fairly steady level since 1894, except in 1897 when they rose to the high level of 628 in consequence of a very large increase in the North-Western Provinces and Oudh and in the Panjab. In Burma, the Central Provinces, and Berar also there was a very large increase in that year. The sentences of transportation, rigorous imprisonment, and whipping also rose far above the average in the same year. The distress of the country generated a great number of thefts, and in the North-Western Provinces there was an outbreak of dacoity in some districts, while to the disturbed condition of the Panjab frontier may be ascribed a great part of the murders in that province. With the restoration of normal conditions generally the criminality of the country no longer indicated abnormal proportions in 1898.

173,187 persons appealed against the decision in their cases, and the appeals were rejected and sentences confirmed in the case of 117,897 persons, being 68 per cent of the whole. The sentences were reversed or the proceedings quashed in the case of 23,602 persons, being 13·6 per cent of the whole, in the case of 7,634 persons a new trial was ordered, and the sentences on 13,078 persons were or otherwise altered. Very few sentences—only 358—were enhanced.

V.
PRISONS.

[TABLES I TO 14, PAGES 30 TO 71.]

In 1898 there were in British India 40 central prisons, 192 district prisons, and 496 subordinate prisons and lock-ups, with a daily average population of 106,447 prisoners, of whom 96,853 were convicted prisoners, the others being under trial, except for 482 civil prisoners. The total cost of maintaining the prisons was R65,97,361, a much smaller sum than in 1897, when the prison population was largely augmented as one of the effects of drought and scarcity. The cost of the prisons in each of the last five years has been :

	R
1894	56,33,161
1895	57,54,923
1896	62,65,477
1897	75,96,798
1898	65,97,361

The principal items into which the expenditure is divided are—taking the figures for 1898 :

	R
Establishment	21,49,989
Dieting	30,31,736
Hospital charges	3,42,940
Clothing and bedding	3,52,406
Sanitation	89,766
Moving prisoners	1,94,624

Against the gross cost of R65,97,361 are to be set R12,97,857 earned by the prisoners, leaving the net cost to Government just under 53 lakhs of rupees.

The prisons at the beginning of the year contained 110,228 prisoners, male and female, and they received during the year 466,453 others, making a total of 576,686,—of whom 25,016, being 4·3 per cent were females ; 474,305 prisoners were discharged or died, and the population at the end of the year numbered 102,380, the daily average of the year numbering 106,447, of whom 2,927—being 2·75 per cent—were females. These prisoners were thus apportioned off to each province :

	No.	Ratio to population (per mille).
North-Western Provinces and Oudh	32,133	·07
Bengal	18,988	·08
Panjab	12,953	·06
Burma	12,672	·02
Madras	10,936	·03
Bombay	10,167	·05
Central Provinces	5,054	·05
Assam	1,583	·03

Of convicted prisoners there were 101,321 in the prisons at the beginning of the year, and 174,641 were imprisoned during the year, making a total of 275,962, of whom 13,287 (4·8 per cent) were females.

177,963 prisoners were released during the year; 1,051 were transported; 37 were sent to lunatic asylums; 58 escaped; 427 were executed; 2,498 died.

The principal offences for which the prisoners were confined were :

Theft	38,542
Housebreaking and house trespass	15,995
Assaults and aggravated assaults (hurt and grievous hurt)	15,800
Bad livelihood	14,033
Against the public tranquillity	10,295
Receiving stolen property	9,674

V—*continued*PRISONS—*continued*

The religions of the prisoners were :

Hindus and Sikhs	.	.	107,220	
Muhammadans	.	.	47,082	
Buddhists and Jains	.	.	14,192	
Christians :				
European	.	.	477	} 2,197
Eurasian	.	.	245	
Native	.	.	1,475	

The Muhammadan community contribute a disproportionately large number to the prison population, being to the Hindus and Sikhs as 1 : 2·3, their proportion to the total Hindu and Sikh population of the country being only as 1 to 3·6. But the disproportion does not extend to Muhammadan females, for whereas these form only 3 per cent of the Muhammadan prison population, the proportion of women in the Hindu prison population is 7·5 per cent. Bengal and the Panjab contribute from their large Muhammadan population nearly two-thirds of the prisoners of that religion; and Bombay contributes a disproportionately large number.

The European element in the Christian prison population is mainly recruited from the seafaring class and from the army. Of the Eurasians nearly half are to be found in the prisons of Bengal, Madras also contributing a considerable proportion: elsewhere the number of Eurasians in prison is comparatively small.

Out of 174,579 convicted prisoners admitted during the year, as many as 151,275 (about 87 per cent) were illiterate, and 4,519 were able to read only, while 18,255 (about 10·5 per cent) were able to read and write. The female prisoners were almost entirely illiterate, not more than 63 out of 10,538 being able to read and write, while 13 were able to read only.

The bulk of the male prisoners came from the rural labouring class, their occupations before imprisonment being described as "engaged in agriculture and with animals:" there were 93,428 prisoners of this class. The previous occupations of the other prisoners are thus described :

In service or performing personal offices	.	16,287
Engaged in commerce and trade	.	7,920
Professional	.	6,729
Employed in mechanical arts, manufactures, engineering operations, etc,	.	5,403
Employed under Government or municipal or other local authorities.	.	4,132

Of the prisoners admitted in 1898, well over half—91,265—were sentenced to terms not exceeding three months in duration; and 121,022—being about 70 per cent of the whole—were sentenced to terms not exceeding six months. In about 14 per cent of the admissions the prisoners had been previously convicted.

In the daily average strength (106,020) of the prison population in 1898 the daily average of sick was 3,953, being 3·7 per cent, and there were 2,677 deaths in the year, a much smaller number than in 1897 when the mortality was excessive in the prisons of the Central Provinces, the North-Western Provinces and Oudh, Bengal, and Madras, due in the main to the exceptional conditions of the year which crowded the prisons with an enfeebled population. In the Central Provinces especially there was terrible mortality in 1897—as many as 999—while there were only 175 in 1898.

VI.

POLICE.

[TABLES I TO 11, PAGES 72 TO 101.]

The district is the unit for the police as it is for the executive and judicial administration. Each has a force under charge of a Superintendent, aided by one or more assistants, and the whole body is controlled by the Inspector General. In addition to the district police, which is

VI—*continued*POLICE—*continued*

paid from imperial and provincial revenues, there are police in municipalities and cantonments paid from local funds. The strength of the police force which is paid from imperial and provincial revenues was as follows in 1898 :

Inspectors General, Deputy and Assistant Inspectors General	33
District and Assistant Superintendents	468
Inspectors	1,222
Deputy and Sub-Inspectors, or Chief or European Constables	4,853
Head Constables or Sergeants	17,577
Constables, of whom 2,460 were mounted	117,387
Water Constables	548

making a total of 142,088.

The cost of this force amounted to ₹2,86,50,449 (£1,910,030).

The police employed in municipalities, cantonments, etc., represented a force of 1,606 officers and 14,948 men, and the total cost of all the Indian police amounted to ₹3,09,39,597 (£2,062,639). Of this sum ₹9,34,914 was allotted as pay and allowances of controlling officers; ₹39,18,429 as pay and allowances of district and assistant superintendents; and ₹2,05,23,279 as pay of subordinate officers and constables.

The great bulk of the police consists of natives, the proportion of Europeans and Eurasians being very small. A large proportion of the Europeans is employed in the higher ranks, a certain number also being employed in the larger towns as inspectors and constables. In the higher ranks of the force above that of inspector the number of natives is extremely small and that of Eurasians still smaller. The distribution by race in 1898 was as follows :

	Europeans.	Eurasians.	Natives.
District Superintendents	258	1	7
Assistant ditto	166	9	19
Inspectors	272	83	867
Deputy or Sub-Inspectors, Chief and } Head Constables, Sergeants . . . }	134	92	22,639
Constables	105	8	121,604
	<u>935</u>	<u>193</u>	<u>145,136</u>

The force contained in 1898, 49,705 Muhammadans and 82,221 Hindus.

The number of cognisable cases investigated by the police, either on report or otherwise, in 1898, was 608,500, a great reduction on the number (702,414) reported in 1897, due evidently to the relaxation of the strain of famine in the North-Western Provinces, Bengal, Bombay, the Panjab, and the Central Provinces. Of these cases 353,015 (between 59 and 60 per cent) were tried and ended in conviction. Of the number of persons arrested by the police in connection with these cases 445,530, being 80·6 of the arrests, were tried and convicted, and 17,057 remained under trial at the close of the year. Of the persons concerned in non-cognisable offences, 938,910 appeared before the Courts, 80,538 were discharged without trial, 198,544 were acquitted or discharged, 266,905 were convicted, and 102,797 were under trial at the close of the year.

Property was recovered in 109,452 cases out of the 230,134 in which it was stolen, being 47·5 per cent of the whole. The property stolen was valued at ₹10·82 lakhs and that recovered at ₹3·42 lakhs, being less than a third.

Turning to the record of professional crime dealt with by the police it appears that thagi by strangulation may be regarded as practically extinct, in British territory at least : there was no case of this kind in 1898, and but one, in Berar, in 1897. Thagi by poisoning has also become a rare phenomenon : no cases were reported from any province in 1898, but there were 7 cases, in Bengal, in 1897. Other forms of professional crime continue, however, to be numerous. Of dacoity there were 673 cases in 1898 and 1,178 in 1897, but the decline is not as great as it seems, for in Madras 158 such cases which were reported in 1897 (none being reported in 1898) would seem to have been erroneously

VI—concluded

POLICE—concluded

not having been committed by gangs existing by crime alone. More than half of the dacoity cases were reported in both years from the North-Western Provinces and Oudh, and a large part of the other half from Bengal. In these cases 15,341 persons were reported to have been concerned in 1898, but not more than 2,766 were brought to trial after arrest, whence it may be inferred that on the occurrence of a dacoity the police net is cast wide.

Of robbery there were 938 cases reported in the year and 1,274 in the preceding year, the number of persons concerned being 2,786 and 3,640. Under this head, as under the head of dacoity, Madras reported erroneously 195 cases in 1897, none being entered in 1898. About three-fourths of these cases are reported from the North-Western Provinces and Oudh.

Under the head "cattle theft, etc.," there were 4,734 cases reported in 1897 and 3,574 in 1898. In this form of professional crime the Panjab claims precedence over the other provinces, the North-Western Provinces and Oudh, however, following at no great distance. Under this head also Madras reported erroneously the occurrence of 1,289 cases in 1897, so that, as under dacoity and robbery, the decrease is not as large as it appears to be.

In an actual strength of 145,732 officers and men, the armament of the force was as follows :

With firearms :

Rifles	2,628
Breech-loading smooth-bores	44,555
Muzzle-loaders	1,275

Without firearms :

Swords	36,703
Batons only	58,517

190 officers and 1,984 men were dismissed during the year, and 4,606 officers and 16,634 men fined, degraded, or otherwise punished departmentally, while 1,781 officers and men were punished judicially. The total of 25,195 members of the force who were punished departmentally and judicially constituted 17 per cent of the actual strength.

The standard of education in the force is not high. Of 24,107 officers only 20,430, and of 121,625 men only 50,800, know how to read and write, illiterates being in the ratio of 15 per cent among the officers and as much as 58 per cent among the men.

VII.

REGISTRATION.

[TABLES I TO 14, PAGES 102 TO 118.]

The number of registrations effected in 1898-99 was much smaller than in the preceding year, and smaller also than in 1896-97. In the five years the number of registrations affecting immovable property was :

1894-95	2,419,935
1895-96	2,388,724
1896-97	2,590,327
1897-98	2,747,243
1898-99	2,562,175

The bulk of these registrations consists always of instruments of which registration is compulsory, these representing from year to year about three-fourths of the whole. The principal instruments registered, both in the compulsory and optional classes, are deeds of mortgage, and it is interesting to note how the fluctuations in these follow the vicissitudes of the seasons :

	Mortgages of Rs100 and more.	Mortgages of less than Rs100.
1894-95	519,286	456,071
1895-96	523,255	431,496
1896-97	551,524	491,162
1897-98	586,143	550,847
1898-99	541,442	484,362

VII—*continued*REGISTRATION—*continued*

In these figures we trace the effects of the famine of 1896-97. Beginning in September 1896 the famine lasted until September 1897, its greatest intensity being felt in the first six months of 1897. There was a sudden and large increase in the number of mortgages registered in 1896-97, followed by a still larger increase in the following year. With the return of good harvests in 1898-99, the number again declined, but not to the level of the years before the famine. In Madras the number of mortgages did not decline at all in 1898-99.

Similar fluctuations are observable in the number of instruments of sale of immovable property :

	<i>Compulsory.</i>		<i>Optional.</i>
	Over ₹100.	Under ₹100.	Under ₹100.
1894-95 . . .	346,833	395,637	13,997
1895-96 . . .	357,988	387,957	15,736
1896-97 . . .	381,889	420,986	19,167
1897-98 . . .	402,437	458,929	17,988
1898-99 . . .	390,457	427,100	14,774

And for the same reason the fluctuations in the value of the immovable property transferred follow the same curves :

	Rx.
1894-95	53,919,382
1895-96	63,332,058
1896-97	70,317,014
1897-98	66,858,425
1898-99	63,165,777

In the same way the registrations of instruments of sale of movable property and of obligations for the payment of money rose markedly during those two bad years, and then declined.

The income of the Department varies with the number of registrations, and it was much smaller in 1898-99 than in the two preceding years, amounting to Rx. 438,128. The charges amounted to Rx. 267,561, being about 61 per cent of the income. The average incidence of the charges in the last five years approximates to 60 per cent of the income.

The number of mortgages of immovable property, valued at ₹100 and upwards, registered in Madras is much larger than in any other province, and that province only comes second to Bengal in regard to mortgages of immovable property of smaller value :

	Value ₹100 and more.	Value under ₹100.
Madras	196,598	172,400
Bombay	62,235	9,763
Bengal	138,558	243,652
North-Western Provinces and Oudh	51,154	25,586
Panjab	62,013	27,375

Madras also contributes a disproportionately large share of the gross income of the Department, the receipts in that province amounting in 1898-99 to Rx. 127,971, being as much as 29 per cent of the whole.

VIII.

EDUCATION.

[TABLES I TO 10, PAGES 119 TO 232.]

The numbers receiving education in public and private institutions have risen in the last decade from 3,635,198 to 4,357,821, an increase of 722,623, being at the rate of about 20 per cent, or twice the normal rate of increase of the population in a decennial period. The increase in the number

VIII—continued

EDUCATION—continued

scholars was in the ratio of 18·4 per cent, the females having increased at double that rate of progress, namely 36·3 per cent. The relative numbers of males and females were :

		1889-90.	1898-99.
Males	.	3,340,342	3,955,668
Females	.	294,856	402,153

the proportion of females to males receiving instruction being roughly in the proportion of one to ten.

Most of these are taught in public institutions, which are classified as regards their administration as follows :

		No.	Number taught.
Under public management	{ Managed by Government	1,109	98,901
	{ Managed by Local Fund Boards and Municipalities	17,855	920,802
	{ Maintained by Native States	3,840	182,488
Under private management	{ Aided by Government or by Local Fund Boards and Municipalities	61,494	2,010,575
	{ Unaided	22,845	543,115
TOTAL			3,755,881

The number in private institutions amounted in 1898 to only 601,840, which is less than 1·4 per cent of the whole number under instruction, more than 86 per cent being taught in “public” institutions. Nearly 70 per cent of the number under instruction are taught in schools managed or aided by the State or by local bodies—about 46 per cent in aided schools and 23·4 per cent in schools directly managed by Government or local bodies. Management by Government, however, is now a comparatively small feature in the educational system.

The classification of the educational institutions of the country, as regards the description of education imparted, and the number attending each class, is as follows :

UNIVERSITY EDUCATION—		
<i>Arts colleges :</i>		
English		15,845
Oriental		521
<i>Professional colleges :</i>		
Law		2,603
Medicine		1,104
Engineering		816
Teaching		71
Agriculture		46
SCHOOL EDUCATION, GENERAL—		
<i>Secondary schools :</i>	Males.	Females.
High schools	210,896	9,802
Middle English schools	162,234	11,850
Middle Vernacular schools	155,584	18,905
<i>Primary schools</i>	2,959,068	178,478
SCHOOL EDUCATION, SPECIAL—		
<i>Schools for special instruction</i>		28,158

The schools for special instruction, forming the last entry in the foregoing list, extend over a wide range of subjects. Training schools for masters and mistresses contain 4,467 and 1,144 students respectively, and the other special schools, and the numbers attending them, are :

Schools of art	1,315
Law schools	467
Medical schools	2,565
Engineering and surveying schools	1,103
Industrial schools	3,435
Other schools	13,662

VIII—continued

EDUCATION—continued

The colleges and schools detailed above are all “public” institutions. In addition to them there are the “private” institutions, which are classified as follows :

<i>Advanced teaching:</i>	
Arabic or Persian	41,175
Sanskrit	25,131
Any other Oriental classic	1,003
<i>Elementary teaching:</i>	
A vernacular only or mainly	349,968
The Korán	174,522
Other private schools, not conforming to departmental standards	10,041

In university education the colleges which train for the obtainment of degrees in arts contain more than three times the number of students who are attracted to the colleges which train for special degrees. In these latter the students going through the course for a degree in law greatly outnumber the students training for the attainment of degrees in all the other special courses combined.

Of the boys and girls at school in public institutions, amounting in number to 3,706,817, the great majority—as many as 84·6 per cent—are to be found in the primary schools and a rather larger proportion (524,490 out of 601,840) receive elementary instruction in the “private” institutions. The middle vernacular schools contain a smaller number of boys than either the high schools or the middle English schools, but they appear to be more frequented by girls than the schools of either of the other two classes. It is clear that boys who pursue their studies beyond the primary schools prefer to go to the schools where English is taught, for the number of boys in the middle vernacular schools not only does not tend to increase, but in the quinquennial period there has been a distinct tendency towards a decline, while the numbers attending the high schools and the middle English schools indicate a rising level.

The condition and stages of education of the boys and girls in public institutions on the 31st March 1899 are exhibited in the figures below :

	Boys.	Girls.
<i>Lower Primary stage—</i>		
Not reading printed books	610,728	97,850
Reading printed books	2,118,804	224,874
<i>Upper Primary stage</i>	398,692	24,905
<i>Middle stage</i>	154,387	7,579
<i>High stage [not matriculated]</i>	67,514	1,484

On the same day 3,983,723 students (in public and private institutions) were learning only a vernacular; 477,745 were learning English, those learning only a vernacular being therefore more than eight times as numerous as those learning English; and 593,396 were learning a classical language.

The figures below indicate the extent to which the people of each province send their children to educational institutions, and the ratio of the school-going population to the total population according to the last census. The figures are for 1898-99 :

	Males.	Females.	Total.	Ratio per cent.
Bengal	1,564,176	104,609	1,668,785	2·3
Madras	715,763	124,284	840,047	2·3
Bombay	550,259	79,459	629,718	3·3
North-Western Provinces and Oudh	359,857	18,393	378,250	0·8
Burma	241,719	28,538	270,257	3·5
Panjab	238,667	22,430	261,097	1·2
Central Provinces	129,794	11,182	140,976	1·3
Assam	91,810	8,013	99,823	1·8
Berar	50,769	3,214	53,983	1·8

Burma takes the lead educationally, a distinction which is in some degree due to the training given in the schools attached to the monasteries or *hpungyi kyaungs* in that province. Burma, moreover, has a relatively considerable number of girls in educational institutions, most of them in primary board or

VIII—*continued*EDUCATION—*continued*

aided schools, many of these being kept up by missionaries of the different denominations who are doing excellent work in this direction in Burma. Bombay follows Burma very closely; and indeed, if Sind were separated, that province being still comparatively backward, the presidency (properly so called) would stand first of all the provinces in point of sending to school the largest ratio of the population. Bengal and Madras, both standing on the same level, follow next after Bombay, but at a considerable interval. The other provinces are still very backward, the North-Western Provinces presenting the worst record of all.

The number of university graduates in 1898-99 was :

Arts	1,444
Law	431
Medicine	5
Engineering	7
Oriental languages and literature	2

In the last decennial period the universities have passed out 12,543 graduates in arts and 2,971 in law, a total of 15,514 graduates in these two subjects. Contrasted with this crowd we find that in the same period not more than 65 graduated in medicine and 80 in engineering, one reason for these very small numbers being doubtless found in the fact that the possession of a degree in medicine or engineering does not by itself qualify for the higher grades of Government professional service without special training in England, nor does the mere possession of the degrees, without other guarantees of competence, command the confidence of the public. In Oriental languages and literature—a degree conferred only by the Panjab university—there have been only 37 graduates in the ten years, while the same university conferred in the same period 866 degrees in arts. The university of Madras has passed out 4,067, and the university of Calcutta 4,212, graduates in arts in this period, the two together accounting for two-thirds of the M. A.'s and B. A.'s of India.

During the same period 58,492 undergraduates were enrolled, of whom 34,847 were entered for the arts course. It seems therefore that in these ten years but 26·5 per cent of the undergraduates attained to the possession of degrees.

Turning to the classification of scholars by race or creed, the following are the numbers as they stood on the 31st March 1899 :

Europeans and Eurasians	30,125
Native Christians	118,266
Hindus	2,947,170
Muhammadans	933,832
Others	328,428

The classification is defective by the omission of Buddhists and Zoroastrians, who are grouped under "others"; and the defect is unfortunate because it is well known that in both these communities education is very generally sought and given, and it would have been interesting to obtain a record of the facts. The statistics are also defective in not separating males from females in the classification, thus preventing the possibility of precise comparison of the relative dimensions of female education in each class of the community. So far as the statistics go they indicate that the number receiving education on the 31st March 1899 bore to the population of each class a ratio of 13·3 per cent for Europeans and Eurasians and of 1·9 per cent each for Hindus and Muhammadans.

The expenditure on education has steadily increased each year :

	R
1894-95	3,31,58,447
1895-96	3,51,44,106
1896-97	3,53,22,523
1897-98	3,56,32,725
1898-99	3,62,15,535

The direct expenditure on colleges and schools in 1898-99 was R2,83,71,105, the difference between that sum and the total expenditure being classed as indirect expenditure on the universities,

VIII—concluded

EDUCATION—concluded

direction, inspection, scholarships, buildings, and so forth. The direct expenditure was thus divided :

	R
Arts colleges	24,47,939
Professional colleges	9,92,470
Secondary schools	1,16,51,310
Primary schools	1,13,05,240
Training schools	7,29,647
Other special schools	12,44,499

The sources from which the total expenditure was met were :

	R
Provincial revenues	93,54,402
Local Funds	57,16,158
Municipal Funds	14,68,774
Fees	1,10,84,149
All other sources	85,91,962

The expenditure on education is met to the extent of between 30 and 31 per cent from fees.

IX.

PRINTING PRESSES AND PUBLICATIONS.

[TABLE 1, PAGES 233 AND 234.]

The number of registered presses rose in the ten years ending 1898-99 from 1,395 to 2,061, an increase of about 47 per cent.

The number of newspapers rose in the same period from 529 to 686, an increase of about 29 per cent.

The number of periodical publications (other than newspapers) increased from 338 to 462, an increase of about 36 per cent.

The number of books published in English, or in some other European language, increased from 814 to 1,125, being at the rate of 38 per cent.

The only decline has been in books published in the Indian languages, whether modern or classical. These have been reduced in the ten years from 8,760 to 6,079, a decrease of 30 per cent. But the issue of 8,760 books in 1889-90 was exceptionally large, and the annual average for the period excluding that year was much lower. In the last three years the number of such books was approximately 6,000 annually.

The provincial distribution of the productions of the printing press is as follows for 1898-99 :

	Newspapers.	Other periodicals.	English books.	Indian books.
Madras	90	98	260	797
Bombay	198	113	115	1,020
Bengal	118	120	539	1,635
North-Western Provinces and Oudh	130	69	92	1,228
Panjab	95	38	104	1,222
Burma	31	19	8	95
Central Provinces	10	2	6	35
Assam	8	...	...	51

The fertility of the Bengal presses is noticeable, especially in the production of books printed in English, which greatly exceed in number those produced in any other province. In the number of newspapers, however, Bombay stands first, followed by the North-Western Provinces and Oudh.

X.

VITAL STATISTICS.

[TABLES I TO 11, PAGES 235 TO 248.]

These statistics are still extremely imperfect, and they can be regarded as possessing only comparative value, the errors and defects which pervade them being repeated, in much the same degree, from year to year. All conclusions and inferences from them must be drawn under reserve and with much caution. The population in which registration is carried on is 214 millions, which is 97 per cent of the total population, but the registration is imperfect and defective except in urban areas, and these are very limited in area and population.

The number of births recorded in 1898 was 7,354,582, of whom there were 3,805,139 males and 3,549,443 females. The numbers are very steady from year to year, with the exception of the famine and plague year 1897 when there was a material decline. In that year, while the number of births declined the number of deaths increased, and there was an excess of deaths over births. The figures in all the other years point to an excess of births over deaths.

The general ratio of births in each 1,000 of the population was, in each of the five years :

1894	.	.	.	.	.	35'37
1895	.	.	.	.	.	34'57
1896	.	.	.	.	.	36'06
1897	.	.	.	.	.	33'98
1898	.	.	.	.	.	34'33

Thus the people had not completely recovered in 1898 from the effects of the famine of 1897. The reduction in the birth rate in 1897 was most strongly marked in the North-Western Provinces and Oudh and in the Central Provinces, the two provinces in which the famine was most intense, but it is also noticeable in the other provinces which were affected. In Assam also there was a marked decline in 1898, the year of the earthquake when sickness was very prevalent and the mortality due to *Kala azar* rose to a high level.

The highest ratio of births is to be found in the Panjab, where it has varied in the five years between 41 and 44 per 1,000; and it is notably low in Madras, where it varied from 27'4 to 30. In Coorg the ratio is even lower than in Madras, and in this small tract, if the statistics are to be trusted, the inference must be drawn that the people are in a fair way to extinction, for the deaths largely outnumber the births. This is not the case, however, and the registration needs amendment.

The male births outnumber females in the proportion of about 107'4 to 100, but the female deaths are to the male deaths only as 100 to 113.

The total number of registered births and deaths in the five years ending 1898 were :

	Births.	Deaths.
Males	19,205,523	17,854,042
Females	17,878,804	15,744,280
TOTAL	37,084,327	33,598,322

The excess of births over deaths was therefore only 3,486,005 in a population of 214,223,555 during the five years : this is probably not more than a third of the real excess.

The increase in the ratio of mortality almost throughout the country in 1897 is very marked. The general ratio was :

1894	.	.	.	.	.	33'97
1895	.	.	.	.	.	33'62
1896	.	.	.	.	.	32'04
1897	.	.	.	.	.	36'03
1898	.	.	.	.	.	26'56

The higher level of 1897 was conspicuous in Bombay, the North-Western Provinces and Oudh (which also suffered from an excessively high death rate in 1894), in Madras, and above all in the Central Provinces, where the ratio reached the extraordinary level of 69'32, this figure following on the high figure of 49'31 in 1896. In Berar also the death rate was very high from 1894, until it reached the

X—continued

VITAL STATISTICS—continued

exceptional level of 52·6 in 1897, declining again in 1898 as low as 23·4. In Assam and Coorg also 1897 was a fatal year. The elevated curve of 1897 was, however, followed by a depression in 1898, when conditions were restored to normality throughout India. It is to be feared that the record of 1899, and still more 1900, will again be bad as a result of the outbreak of the present intense famine.

The mortality in towns, as recorded, is always relatively much higher than in the rural tracts :

	Urban.	Rural.
1894 . .	43·91	33·26
1895 . .	32·84	28·65
1896 . .	36·45	31·66
1897 . .	43·65	35·47
1898 . .	33·17	26·05

It is true that in many of the larger cities and towns conditions hostile to human life exist in a higher degree than they do in the country ; but the presence of such conditions can hardly be accepted as a complete and sufficient reason for the marked difference in the ratio, and probably an important factor is to be found in the greater efficiency of registration in the towns. Another reason is to be found in the occurrence from time to time of an epidemic within urban limits, as, for instance, of plague in Bombay and Karachi, when the ratio of deaths in the population of a restricted area is immediately and largely increased. An extraordinary ratio—as high as 81·57—is noticeable in the towns of the Central Provinces in 1897, followed, on the disappearance of famine in 1898, by a fall to 27·62.

The whole recorded mortality in 1898 was 5,688,838 ; and in this total 1,380,440 represent the deaths of infants under one year, and 904,214 of children between one and five years old. The mortality of infants up to five years old thus forms 40 per cent of the whole in 1898 ; it was 37 per cent in 1897 when famine and plague prevailed.

Passing from infant mortality it appears from the figures that the highest number of deaths is amongst persons of 60 years of age and more, these numbering 684,538 in 1898, being 12 per cent of all the recorded deaths. But the record of age in India must be regarded, as almost entirely untrustworthy.

The causes of mortality are not specified in the detail which is to be desired, the specification being limited to *cholera*, *small-pox*, *fevers*, *bowel complaints*, and *injuries*. The last three items are susceptible of great and useful expansion. Fevers, for instance, which account for two-thirds of the whole mortality, include every type of fever from simple continued fever to malarial and enteric fever and the bubonic plague, and in the rural tracts it frequently happens that diseases of the respiratory system accompanied by high fever are registered under the head fevers. The deaths from fevers were very numerous in 1896 and 1897 and also in 1894 :

1894 . . .	4,966,183
1895 . . .	4,229,125
1896 . . .	4,541,236
1897 . . .	4,989,911
1898 . . .	3,817,456

The year 1894 was distinguished by a high mortality from fevers in Bombay, the North-Western Provinces and Oudh, and the Panjab ; and there was a recurrence of a high range of deaths in 1896 and 1897 in these same provinces and in the Central Provinces and Assam. In this mortality are evident the effects of famine and plague. The effects of famine are also manifest in the high mortality from “bowel complaints” in 1894 and again in 1897. The deaths from these diseases were very numerous in Madras, Bombay, the Central Provinces, the North-Western Provinces, and, in a minor degree, in Bengal. The total number of deaths was :

1894 . . .	258,314
1895 . . .	237,546
1896 . . .	235,614
1897 . . .	396,724
1898 . . .	209,035

*X—continued*VITAL STATISTICS—*continued*

The deaths from cholera and small-pox vary greatly from year to year, but of the five years only one (1898) presents a comparatively low record of mortality from cholera, while the two years 1896 and 1897 were distinguished by an exceptionally high death-rate from small-pox :

				Cholera.	Small-pox.
1894	.	.	.	521,647	42,046
1895	.	.	.	311,068	44,082
1896	.	.	.	469,679	136,605
1897	.	.	.	550,787	160,217
1898	.	.	.	150,817	55,713

In this quinquennium 2,003,998 persons are reported to have died of cholera, the annual average mortality from this cause being upwards of 400,000 persons. From small-pox the deaths were about one-fifth the deaths from cholera, amounting in the quinquennium to 438,663, which is not much more in five years than from cholera in one.

The conditions of the country have been so disturbed by the presence of famine and plague in extensive regions, and the registration in some places is so much more defective than in others, that it would be futile to attempt to draw any inferences from the statistics of the relative positions of the provinces from the point of view of healthiness. In 1898 conditions were more or less normal, though some provinces were still suffering from the recent scarcity, and in that year the relative positions of the provinces, looking at the ratio of mortality per mille of the population, were as follows

Assam	.	.	.	.	.	36'15
Coorg	.	.	.	.	.	31'44
Panjab	.	.	.	.	.	31'05
Bombay	.	.	.	.	.	29'16
North-Western Provinces and Oudh	.	.	.	.	.	27'38
Bengal	.	.	.	.	.	26'57
Burma	.	.	.	.	.	25'09
Central Provinces	.	.	.	.	.	} 23'4
Berar	.	.	.	.	.	
Ajmer-Merwara	.	.	.	.	.	22'13
Madras	.	.	.	.	.	21

June and July are the healthiest months of the year in India generally, the death-rate being then at its lowest level. With the progress of the rains the rate rises in August and September, and after the cessation of the rains the autumnal fevers, and other diseases arising out of the saturated condition of the soil, raise the death-rate to a high level in October. The cold weather brings with it in November and December a still higher range of mortality resulting from pneumonia and pulmonary complaints, these two months being the unhealthiest of the year. In January the death-rate recedes, though still on a high level, and it falls to its lowest level in February, the healthiest month of the year. In March, April, and May the rate is raised by the occurrence of cholera and small-pox at that season, though it is otherwise healthy. Speaking generally, the spring and summer months—February to July inclusive—are the healthiest time of the year, and the autumn and winter months—August to January inclusive—the unhealthiest. The rate of mortality runs as follows in these two periods of the year :

<i>Spring and summer.</i>		<i>Autumn and winter.</i>	
February	. 2'14	August	. 2'73
March	. 2'4	September	. 2'73
April	. 2'49	October	. 3'01
May	. 2'54	November	. 3'07
June	. 2'33	December	. 3'05
July	. 2'35	January	. 2'65

The coincidence between the rise in mortality and the fall in the temperature is most marked in Northern India; in the Peninsular region the diurnal range of the thermometer is not nearly as great as in the Continental region.

X—concluded

VITAL STATISTICS—concluded

The Christians are, as might be expected, the healthiest section of the community, the registration of mortality giving for them the lowest ratios in 1897 and 1898, and the registration is much more complete and accurate for them than for the other sections. The ratios stand thus for the last five years :

	Christians.	Hindus.	Muhammadans.	Buddhists.
1894 . . .	26'53	32'53	29'99	22'09
1895 . . .	24'74	30'32	29'66	22'71
1896 . . .	27'51	32'19	30'06	25'8
1897 . . .	25'34	39'44	37'68	27'88
1898 . . .	21'03	27'5	27'26	25'84

XI.

HOSPITALS AND DISPENSARIES.

[TABLES 1 TO 4, PAGES 249 TO 257.]

The number of these institutions increased from 2,121 in 1894 to 2,336 in 1898. They are grouped in the following classes :

- (1) Maintained and managed by the State
- (2) " " by Local Funds
- (3) " " by private individuals and associations
- (4) Supported by private donations and subscriptions, but aided by grants from the State or from Local Funds

There was an increase in the number in each class, most marked in the first. The great bulk of the institutions, however, consists of those of the second class, these numbering as many as 1,651, being 71 per cent of the whole. Only 279 hospitals are in the third class (maintained entirely by private individuals and associations), and of these there are as many as 98 in Bombay and Sind, with a population of 19 millions, and 96 in Bengal, with a population of 71 millions; there are only seven in Madras. In the last class—institutions supported by private subscription or endowment, but aided by the State or from Local Funds—there are 168. Of such, there are 75 in Bengal, and only six in Bombay ; 43 in the North-Western Provinces and Oudh, and 23 in Madras. Grouping these two classes of private hospitals, whether aided or not by State or Local Funds, their distribution is as follows :

Bengal	178
Bombay	105
North-Western Provinces and Oudh	80
Central Provinces	36
Madras	35
Panjab	9
Coorg	2
Burma	1

The number of indoor patients treated in 1898 was 334,261, a smaller number than in 1897 when the famine and the epidemic of plague were both at the maximum of intensity. Of this number, 27,425, being 8·2 per cent, died, the number cured being reported to be 205,036, or about 61 per cent; the remainder were relieved or otherwise discharged. The average ratio of cured to treated in the four years preceding 1898 was 63 per cent. The number treated in each province was as follows in 1898 :

	No.	Ratio to population.
Madras Presidency	60,244	1'69 per mille.
Bombay Presidency	46,468	2'47 "
Bengal	65,818	'92 "
North-Western Provinces and Oudh	55,589	1'18 "
Panjab	49,068	2'3 "
Burma	34,077	4'38 "
Central Provinces	11,179	1'04 "
Assam	6,977	1'28 "
Coorg	1,381	7'98 "
Berar	3,460	1'19 "

XI—*continued*HOSPITALS AND DISPENSARIES—*continued*

It is not clear why the Madras Presidency should provide a number of inmates for hospitals not much smaller than Bengal, which has more than double the population of Madras. The relatively large number of patients in Burma is due perhaps to the absence of caste restrictions in that province. Another fact to be noticed, though the explanation is obvious, is that the three cities of Bombay, Calcutta, and Madras furnish as many as 58,880 patients, being 17·6 per cent of the whole.

Of the 15,004 indoor patients daily treated on the average in 1898, 3,399 (being 22·6 per cent) were women. The number of children, who are not distinguished according to sex, was 991, or 6·6 per cent.

The number of outdoor patients treated was just over 19 millions in 1898, which has been approximately the figure since 1895. In the statistics these patients are not distinguished according to sex.

The principal diseases treated, according to the specification in the statistics, were :

Malarial fevers	3,201,805
Diseases of the skin	1,939,334
" " eye	1,688,736
Ulcers	1,540,810
Diseases of the lungs and respiratory system	1,189,156
Worms	999,321
Diseases of the ear	861,635
Rheumatism	691,605
Dysentery	379,032
Venereal diseases	376,713

Small-pox and cholera find a very small place in the list, the number of the former being only 2,391 and of the latter 21,304.

The total income of the hospitals and dispensaries in 1898 was Rx 731,587, the sources whence this sum was derived being, to the extent of 75 per cent, as follows :

	Rx.
From Government	255,487
" Local Funds	158,495
" Municipal Funds	136,757

The remaining fourth was mainly derived from interest on investments, from the sale of securities, from subscriptions (Rx 12,548 from Europeans and Rx 42,882 from natives), payments by patients, sale of medicines, and so forth.

The expenditure in the same year amounted to Rx 663,266, of which Rx 122,646 represented salaries and wages defrayed by Government, and Rx 185,773 salaries and wages defrayed from Local Funds. The other principal items of expenditure were :

	Rx.
Drugs and medicines	98,073
Diet	77,416
Building and repairs	86,137

Thus salaries and wages represent about 46·5 per cent of the total expenditure.

XII.

LUNATICS.

[TABLES I TO 7, PAGES 258 TO 271.]

The number admitted into asylums in 1898 was 1,076, the average of the five years ending 1898 being 1,191 ; there were also 83 re-admissions. On the first day of the year there were 4,543 already in

XII—continued

LUNATICS—continued

the asylums, so that the total asylum population of the year was 5,702, the average population being 5,722, of whom 4,528 were males and 1,194 females, the former being nearly four-fifths of the whole. The insane population does not apparently tend to increase, but the insanes admitted into asylums represent only a relatively small proportion of the insane population. Of the insanes in the asylums in the year :

- 464 were discharged cured
- 189 made over to friends (improved in condition)
- 37 " " (not improved)
- 55 discharged otherwise
- 373 died

The religion of the insanes admitted in the year was as follows :

- 156 Christians, of whom 97 were Europeans and Eurasians
- 627 Hindus
- 257 Muhammadans
- 119 other religions

The Christians were 13·5 per cent of the whole, this ratio largely exceeding the ratio of Christians to the total population, which is not more than about 0·7 per cent. The explanation of the apparent excess of insanity amongst them is doubtless to be found, in the main, in the fact that amongst these classes the outbreak of insanity is immediately followed by removal to an asylum as the best place for the comfort and safety of the patient. The Muhammadans contributed 22 per cent, a proportion about equal to their ratio to the general population. Only 54 per cent of the admissions were Hindus, this low proportion being probably due to the fact that many harmless lunatics of that religion remain at large and are not brought to the asylums.

The Christian population of the asylums is mainly maintained from the native Christians of Bombay and Madras, and the most numerous admissions of Muhammadans are in the Panjab and Bombay.

The admissions of all classes are more numerous in Bombay than in any other part of India, the North-Western Provinces following Bombay. The numbers are as follow, for 1898 :

	No.	Ratio per 10,000 of population.
Bombay	282	·15
North-Western Provinces and Oudh	206	·04
Bengal	177	·02
Panjab	170	·08
Madras	134	·04
Burma	88	·11
Central Provinces	73	·07
Assam	29	·05

Of the total admissions in the year, 215 were criminals, the average number of these admitted in the last five years being 277. The average mortality amongst this class was 100 annually, being in the extraordinarily high proportion of 36 per cent of the number admitted.

The occupations (as far as known) of the lunatics who were admitted in 1898 are thus described :

Cultivators and labourers	316
Domestic servants	97
Mendicants and paupers	96
Traders and shopkeepers	87
Soldiers	74
Teachers, students, and writers	69
Artisans	63

Amongst the asylum population (5,702) in 1898, the most prevailing forms of insanity were :

Mania	3,209
Dementia	889
Melancholia	806
Epileptic insanity	334
Idiocy	227

XII—concluded

LUNATICS—concluded

Amongst the alleged causes of insanity the use of hemp is prominent with 644 cases. Hereditary and congenital insanity follows with 371 cases. Epilepsy accounts for 276, and alcoholism for 159 cases. The use of opium is responsible for not more than 34 cases, of which 7 arose out of opium smoking and 27 from opium eating. To moral causes as many as 731 cases are assigned. It should be noted, however, that the classification is defective, the cause of insanity being unknown in more than half the cases in the asylums and inaccurately stated in many cases.

The expenditure on the asylums, which has averaged almost exactly seven lakhs annually and amounted to ₹7,27,821 in 1898, is defrayed for the most part by the State. Of the expenditure in 1898, for instance, ₹5,28,158 was found by the State, ₹62,042 was obtained from fees, and ₹1,37,621 from other sources.

XIII.

VACCINATION.

[TABLES I TO 8, PAGES 272 TO 282.]

Vaccinations are conducted by the agency of a special department established for the purpose, and also by the staff attached to the ordinary hospitals and dispensaries. In the twenty years ending 1898-99 the number of persons vaccinated rose from 4,394,834 to 7,508,301. In the last five years the average number annually vaccinated was 7,774,199. In two of those years, 1896-97 and 1897-98 (which were also the years in which plague and famine prevailed), small-pox was epidemic and carried off an unusually large number of victims; in 1897-98 there were as many as 160,217 deaths from this disease; in 1898-99 the number of deaths declined to 55,713. The cost of the special department in 1898-99 was ₹10,75,526; the average for the five years ending 1898-99 was ₹11,09,543. The work is carried on as a branch of the Sanitary Department in each province under the general control of the provincial Sanitary Commissioner; and the staff employed in 1898-99 included 200 superintendents, 100 deputy superintendents, 370 native superintendents, and 6,665 vaccinators.

The bulk of the expenditure is defrayed from provincial, local, and municipal funds, the sums paid from each source in 1898-99, being :

	R
Provincial	3,92,650
Local	4,47,322
Municipal	1,76,606

The numbers vaccinated by the special department are divided not very unequally between the sexes, males numbering 3,912,544 and females 3,428,402 in 1898-99. Of these numbers 5,758,816 are reported to have been children under six years old who were successfully vaccinated. Assuming the birth rate at 40 per thousand of the population, it is estimated that the number of children under a year old vaccinated successfully (2,854,797) represented 31·4 per cent. of the births.

The ratio of deaths from small-pox in each thousand of the population is lowest in Bombay, Berar, and Bengal, those provinces contrasting markedly with the others.

XIV.

MUNICIPALITIES.

[TABLES I TO 4, PAGES 283 TO 361.]

Municipal self-government is widely diffused in India, every province being furnished with a more or less considerable number of municipal committees. Altogether, including the two large municipal corporations of Calcutta and Bombay, there are 754 of these bodies in India, regulating the civic affairs of areas containing a population of a little under sixteen millions. In many provinces,

XIV—*continued*MUNICIPALITIES—*continued*

extremely small localities possess municipal committees; thus, in the Panjab there are 148 committees for an urban population of just over two millions, the average population being 14,000 for each municipal area; in Bengal the average is still smaller, while in Assam the average municipal area has a population of only about 6,000, and in Coorg hardly more than half that figure.

The municipalities consist of 10,367 members. Almost exactly half this number (5,024) represent *ex-officio* and nominated members, the official element comprising 2,294 members, being 22 per cent of the whole. Practically the municipalities are native in their constitution, the European and Eurasian members numbering only 1,214, being 11·7 per cent of the whole.

The income of the municipalities has increased from Rs452·5 lakhs in 1894-95 to Rs651·71 lakhs in 1898-99, an increase of 44 per cent, but much of this increase is merely apparent, that is, though it is an increase of income it is not an increase of revenue. Deducting from the income all debt incurred, advances, and deposits, and confining attention to substantial revenue, the figures for 1898-99 are Rs420·74 lakhs and those for 1894-95 Rs368·42 lakhs, the increase being about 14 per cent in the five years.

During the five years the municipalities borrowed from Government Rs97·60 lakhs and in the money market Rs170·26 lakhs, and they paid off debt to the extent of Rs72·19 lakhs, the net increase to the amount of debt in this period being Rs195·67 lakhs. More than half of the borrowing—about 55 per cent—was incurred by the municipalities of the cities of Calcutta and Bombay.

Municipal rates and taxes have yielded the sums noted below in the five years (in lakhs of rupees).

1894-95	271·50
1895-96	280·74
1896-97	270·85
1897-98	281·85
1898-99	303·81

About one-third of the taxes in 1898-99 (104·18 lakhs) was derived from octroi, and of this sum three-fifths were obtained from articles of food and drink for men and animals. The octroi is restricted to Northern and Western India, being known only in Bombay, the Central Provinces, the North-Western Provinces and Oudh, and the Panjab. In these regions the octroi is the principal form of municipal taxation, except in the city of Bombay where it is not so important as other sources of taxation. The figures below indicate the extent to which municipal revenues are allowed to depend upon octroi in the provinces in which that form of taxation exists (in lakhs of rupees):

	Octroi.	Other taxes.
Bombay, excluding city	24·56	16·47
Bombay city	14·59	48·39
North-Western Provinces and Oudh	25·76	10·37
Panjab	30·75	2·43
Central Provinces	8·51	2·88

In the Panjab the octroi represents 92 per cent of municipal taxation; in the North-Western and Central Provinces 71 and 74 per cent respectively; and in the Bombay district municipalities 60 per cent.

Apart from the octroi, the principal forms of municipal taxation are the following, the figures being for all municipalities in 1898-99 (in lakhs of rupees):

House and land tax	83·95
Water rate	40·88
Conservancy tax	25·89
Vehicles and animals	13·19
Tolls on roads and ferries	9·88
Professions and trades	8·97
Lighting rate	6·01

There has been a continuous increase from year to year in the income from the taxes on houses and lands, the water, lighting, and conservancy rates, and the taxes on vehicles and animals. But the statistics do not provide the means of discriminating between that portion of the increment which is due to greater productiveness and that which is due to enhancement of rates.

XIV—concluded

MUNICIPALITIES—concluded

A small proportion of the income of municipalities is derived from grants made by the Government, or from local funds or other sources, for specific purposes. These grants amounted to Rs 33.42 lakhs in 1898-99, being swelled by a grant of Rs 15.82 lakhs from Government for medical purposes on account of the plague.

The general incidence of municipal taxation per head of the population of the municipal area was Rs 1.93 in 1898-99, but it varies greatly in different areas, thus :

Presidency of Madras	0.96	Panjab	1.46
City of Madras	2.13	Burma—Upper	1.03
Presidency of Bombay	1.83	Lower	1.3
City of Bombay	7.66	Rangoon	4.98
Bengal	1.05	Central Provinces	1.69
Calcutta	6.73	Assam	1.27
North-Western Provinces and Oudh	1.12	Berar	0.52

The expenditure of the municipalities has been as follows in the five years (in lakhs of rupees) :

1894-95	447.32
1895-96	509.64
1896-97	528.86
1897-98	642.91
1898-99	625.5

the increase being at the rate of about 40 per cent.

The principal items of expenditure are the following, the figures being for 1898-99 and in lakhs of rupees :

Conservancy	90.43
General administration, including cost of collection	52.60
Public works, including roads, buildings, stores, and establishment	47.67
Interest on loans	46.32
Fire establishment, lighting, police	37.35
Water supply	32.01
Drainage	31.67
Hospitals and vaccination	25.01
Education	23.56

A considerable proportion of the expenditure on conservancy is incurred in the larger cities, Bombay being prominent here :

	Rs (lakhs)
Bombay	20.27
Calcutta	9.93
Madras	4.90
Rangoon	3.58

Outside of these cities the sums spent on conservancy are relatively small, some provinces indeed hardly spending anything on this head :

	Rs (lakhs)
Madras	7.15
Bombay	10.22
Bengal	10.85
North-Western Provinces and Oudh	9.71
Panjab	6.28
Burma	3.60
Central Provinces	2.50

XV.

LOCAL BOARDS.

[TABLES 1 TO 4, PAGES 362 TO 379.]

The duties and functions assigned to the municipalities in urban areas are assigned to the Boards in rural areas. They are at work, under the sanction of the legislature (given in and about 1884), in every province except two, Burma and Coorg. Each district has a Board, subordinate to which are two or more local Boards, and, in the Madras Presidency, Union Committees or *Panchayets*. There are in India 203 District Boards, and 516 local Boards subordinate to them; in Madras there are also 381 Union Committees. The population of the tracts over which the Boards have jurisdiction is 193 millions (census figures). The members of the Boards numbered 16,327 in 1898-99, of whom 5,632, being about one-third, were elected. The others were nominated or *ex-officio* members, 8,947 of the former and 1,748 of the latter, and of these latter more than half are on the Madras Boards which are far more largely worked by official agency than the Boards of any other province. The number of nominated members in that province is also far larger than it is elsewhere, and the number of elected members relatively small, there being only 291 elected members in a total of 5,392. The reason for these facts is to be found in the large number of Union Committees in Madras. The presidency of Bombay presents a remarkable contrast to Madras in these respects: the number of *ex-officio* and nominated members is very small, and the proportion of elected members large.

The percentage of elected members in the whole number is as follows :

Madras	.	.	.	.	.	5'4
Bombay	.	.	.	.	.	45
Bengal	.	.	.	.	.	36'2
North-Western Provinces and Oudh	.	.	.	.	.	64'2
Panjab	.	.	.	.	.	43
Central Provinces	.	.	.	.	.	74
Assam	.	.	.	.	.	37'8
Berar	.	.	.	.	.	69'5

Everywhere except in Madras the elective system returns a substantial proportion of the members of the Board, the majority of the members being elected in the North-Western Provinces and Oudh, the Central Provinces, and Berar.

Of the whole 16,327, officials numbered 3,753, being in the ratio of 23 per cent. The Boards are practically manned by natives who constitute 93 per cent of the whole, numbering 15,207 to only 1,092 Europeans and Eurasians, these latter being outnumbered in the proportion of 15 to 1. In proportion to population Assam returns the largest number of Europeans to the Boards, in consequence of the large tea-planting industry in that province.

The income of the Boards, which is derived to the extent of nearly two-thirds from provincial rates imposed and collected by the local Governments and assigned by them to the Boards, amounted in 1898 to ₹316 lakhs. Five years previously it was ₹298 lakhs, the increase in the period being at the rate of 6 per cent. The amount received from provincial rates, which was in 1898-99 ₹198'34 lakhs, increased in the same period by about 18 per cent, having risen from ₹168'40 lakhs. The other most important sources of income are contributions from provincial revenues, which represented ₹26'25 lakhs in 1898-99, and receipts from public works, ₹35'06 lakhs.

The expenditure of the Boards in the same period has risen from ₹299'53 lakhs to ₹311'60 lakhs, an increase of less than 4 per cent. The principal objects of expenditure are: education, ₹64'93 lakhs, largely in the maintenance of schools; medical, ₹37'71 lakhs, mainly on hospitals and dispensaries, sanitation, and vaccination; and, largest of all, the construction and maintenance of public works, such as roads and bridges; this item represents ₹145'92 lakhs. The three heads combined represent four-fifths of the expenditure of the Boards.

XVI.

/ FACTORIES.

[TABLES I TO 5, PAGES 380 TO 399.]

The Department administering the Factories Act recorded as being within the scope of the Act in 1898, 79 factories belonging to the State and to local bodies, such as Municipalities, Port Trusts, and Railways. Of the 79, there were 11 printing presses and 18 railway workshops, 9 canal and engineering workshops, a considerable number of the remainder being military arsenals and factories.

The factories worked by steam and owned by companies or individuals numbered 978 concerns, the more important of these industries being :

Cotton mills	.	.	.	.	.	.	155
Jute mills	.	.	.	.	.	.	33
Cotton presses	.	.	.	.	.	.	398
Jute presses	.	.	.	.	.	.	42
Iron-works and foundries	.	.	.	.	.	.	42
Rice mills	.	.	.	.	.	.	77
Saw mills	.	.	.	.	.	.	57

These represent more than four-fifths of the total number. The factories created by the cotton industry exist principally in Bombay, those relating to the jute industry in Bengal ; while rice mills and saw mills are most largely an industry for the exploitation of the two principal products of Burma—rice and teakwood. Of the other factories there are none largely assigned to any particular industry.

There were also 41 factories not worked by steam. Amongst these were 3 cotton presses, 9 jute presses, 6 printing presses, 3 docks.

There were 422,729 persons employed daily on the average in the factories inspected, namely :

Adults	{	Males	.	.	.	.	.	334,594
	{	Females	.	.	.	.	.	60,603
Children	{	Males	.	.	.	.	.	23,219
	{	Females	.	.	.	.	.	4,313

Of this total 150,253 (being 35 per cent) were employed in factories in Bombay and 165,027 in Bengal, these two provinces employing about three-fourths of all the factory labour of India.

There were 2,316 accidents reported in the factories in 1898, and almost precisely the same number (2,314) in 1897. Much the largest number—1,185, being more than half of the whole—occurred in Bombay, the fact indicating perhaps closer and more intimate knowledge of conditions by the officers administering the law rather than an actually disproportionate number of accidents. Of the whole number of accidents 65 were fatal ; this can hardly be considered a large ratio in a working population of careless habits approximating to half a million daily. There were 537 serious accidents, and 1,714 were of a minor nature.

Only 17 offences against the law were reported in 1898, and of these 9 were neglect to send in notices or returns. Of these 8 occurred in Burma and the only other one was in Bengal. Burma indeed reported 9 out of the whole 17 offences ; in Bombay there were 4, and in Bengal 3.

XVII.

WILD ANIMALS AND SNAKES.

[TABLES I TO 7, PAGES 400 TO 408.]

Human beings killed.

In the 24 years over which the tables extend the number of human beings reported to have been killed by wild animals was 71,826, and by snakes 476,149 ; making together well over half a million people (547,975). It is probable that many such deaths are not reported ; and on the other hand it is also probable that a number of deaths are assigned to the action of wild animals and snakes which were

XVII—*continued*WILD ANIMALS AND SNAKES—*continued*

not so caused. To judge whether the spread of cultivation and the rewards offered by Government for the destruction of wild animals and snakes have had any material effect in diminishing the mortality it will be well to take the 24 years in periods of four years each. The figures of mortality are as follow :

	Wild animals.	Snakes.
Four years ending 1878	3,481	16,560
„ „ 1882	2,773	18,651
„ „ 1886	2,776	20,493
„ „ 1890	2,550	21,050
„ „ 1894	2,880	20,796
„ „ 1898	3,495	21,486

It will be observed that the loss of life from wild animals has remained at a fairly steady level, except in the two periods forming the beginning and end of the series, when it was abnormally high. In both periods the increased mortality occurred in the North-Western Provinces and Oudh and was coincident with prolonged and intense drought and scarcity when wolves are always most daring and dangerous. The increase in the number of deaths of human beings (mostly children) from wolves in those provinces during the recent famine will be apparent from the following figures :

1894	106
1895	246
1896	417
1897	426
1898	379

The mortality from wild animals and snakes is greatest of all in Bengal, the North-Western Provinces coming next, these two provinces indeed reporting nearly three-fourths of the whole number of deaths. The sad pre-eminence of Bengal in this respect will be apparent from the number of persons killed in 1898 :

	By wild animals.	By snakes.
Bengal	1,762	11,123
North-Western Provinces and Oudh	575	4,908
Madras	143	1,664
Central Provinces	409	1,006
Bombay	30	1,215
Panjab	33	1,067
Burma	113	499
Assam	151	153

The most destructive beast is the tiger, to whom may be assigned about a third of the whole mortality, the average approximating to one thousand persons annually. In 1898, 927 persons were killed by tigers, 439 of them in Bengal and 197 in the Central Provinces, the tiger being more destructive in those two provinces than any other animal, the leopard, however, being not very much less dangerous. The wolf is worst in the North-Western Provinces where 82 per cent of the whole mortality from wolves in 1898 is recorded. The following figures state the mortality from each principal kind of wild beast in 1898 :

Tigers	927
Wolves	462
Leopards	394
Bears	102
Elephants	35 (mostly Bengal, Assam, and Burma.)
Hyenas	12
Other animals	1,333

Of the 1,333 deaths from "other animals" as many as 1,024 occurred in Bengal, the largest part of them being assigned to jackals and crocodiles.

XVII—concluded

WILD ANIMALS AND SNAKES—concluded

Cattle killed.

In the 24 years for which the loss of life by human beings has been recorded, the number of cattle killed by wild animals and snakes was 1,579,704, of which 1,488,935 are set down to the account of wild animals. The deaths in the last five years are :

							By wild animals.	By snakes.
1894	.	.	.	.	.	.	91,919	4,877
1895	.	.	.	.	.	.	93,978	6,129
1896	.	.	.	.	.	.	81,559	7,143
1897	.	.	.	.	.	.	76,633	7,504
1898	.	.	.	.	.	.	83,007	8,743

Thus it appears that snakes are not nearly so dangerous to cattle as to human beings, while wild animals prey far more largely on domestic animals than on human beings. The human dwelling is in fact a favourite resort for snakes, while the beast prefers the cowshed. Here the leopard is about as destructive as the tiger, more so indeed in 1898. These two animals combined killed over four-fifths of all the cattle killed by wild beasts in 1898.

The principal losses of cattle occurred in the provinces noted below, Bengal being here also pre-
eminent :

							By wild animals.	By snakes.
Bengal	.	.	.	.	.	.	28,408	755
Assam	.	.	.	.	.	.	16,266	257
Madras	.	.	.	.	.	.	11,583	2,096
Central Provinces	.	.	.	.	.	.	11,759	346
Burma	.	.	.	.	.	.	4,899	4,639
North-Western Provinces and Oudh	.	.	.	.	.	.	6,356	443

Wild animals and snakes killed.

Rewards are given for the destruction of wild animals and snakes, averaging R1,14,463 annually in the last five years, the bulk of them being on account of wild animals. Very little money is now expended on account of the destruction of snakes, no rewards being given in some provinces. The Government also give licenses under the Arms Act free of charge, to possess weapons for the destruction of wild beasts, and there were 51,467 such licenses in force in 1898. The effect of these measures is apparent from the following figures, representing the number of wild animals and snakes killed in each of the last five years :

							Wild animals.	Snakes.
1894	.	.	.	.	.	.	14,009	106,312
1895	.	.	.	.	.	.	15,543	131,726
1896	.	.	.	.	.	.	18,084	122,360
1897	.	.	.	.	.	.	19,045	105,227
1898	.	.	.	.	.	.	19,776	109,383

The principal animals killed in 1898 were 4,106 leopards, 2,517 wolves (1,016 in the North-Western Provinces and Oudh), 1,486 bears, 1,257 tigers, 950 hyenas, 33 elephants, and 9,427 other animals.

* The classification is—

1st class: State hospitals and dispensaries, including all institutions maintained by Provincial Funds and under Government management.

2nd class: Local Fund institutions.

3rd class—A: Institutions maintained by private individuals or associations.

3rd class—B: Institutions supported by private subscriptions or donations, but receiving aid from Government or Local Funds.
